

ABDUL RAFAY

MERN Stack Web Developer

About

Dedicated software development professional with over 2+ years of experience managing end-to-end projects. Proven expertise in frontend, backend, and Rest APIs. A results-driven approach ensures timely project completion, and my adaptable, detail-oriented mindset contributes to the team's and project's success.

Experience

Mern Stack Internee

Wampdo | May 2022 - Dec 2022 (<https://wampdo.com>)

As a MERN Stack Intern at Wampdo, I honed my skills in crafting user interfaces using HTML, CSS, Bootstrap, Tailwind CSS, and React.js. I became proficient in Node.js (Express.js) and successfully integrated APIs. My contributions led to the development of flexible, high-performance systems and exceptional user experiences. This internship provided me with hands-on experience in building robust web applications and solidified my foundation in full-stack development.

MERN Stack Developer

Dzone | Jan 2023 - June 2024 (<https://www.dzonetechnologies.com>)

As a MERN Stack Developer at Dzone Technologies from January 2023 to December 2023, I specialized in HTML, CSS, Tailwind CSS, React.js, Next.js, Node.js, MongoDB, MySQL, Express.js, and Rest APIs. I developed dynamic web applications and integrated gateways, ensuring a comprehensive software development approach.

Projects

TrafikBilder System: (<https://trafikbilder.se>)

I developed an international platform providing traffic images and videos to users. Users subscribe to access these resources, starting with a free account offering limited images and videos, and then upgrading to paid packages. I worked on both the frontend and backend, utilizing React.js for the frontend, Node.js and Express.js for the backend, and MongoDB for the database. The project uses Amazon S3 buckets for cloud storage and is deployed on AWS.

Digital Search Group: (<https://tools.digitalsearchgroup.com>)

As a developer for Digital Search Group's SEO tool project, I created a comprehensive solution to automate SEO processes for a company providing SEO services. This international project involved gathering website order details, business information, and areas to automatically generate keywords and page links. Admins could manage keywords and

import data via CSV or Excel. I handled both frontend and backend development using React.js, Node.js, Express.js, and MongoDB, and the project is deployed on AWS.

101electronics: (<https://101electronics.pk>)

I developed the 101electronics project for a company, which allows users to purchase electronics online. This project manages products, categories, orders, order details, tracking, coupon codes, and companies. I worked on both the frontend and backend, using simple HTML, CSS, Bootstrap, and JavaScript for the frontend, and MySQL for the database.

Zorova: (<https://flexiva-v2.vercel.app>)

I developed the Zorova project, a fitness-based application. I worked on its admin panel's frontend using React.js and backend using Node.js with Express.js. The project includes modules for customer feedback, orders, provider feedback, email management, service pricing, membership packages, offers, locations, terms, policies, tracking, and more.

PackPusher: (<https://packpusher.vercel.app>)

I developed the PackPusher project, an ecommerce website featuring admin and user panels. It's built with Next.js and TypeScript for the frontend, Node.js with Express.js for the backend, and MongoDB for the database. The site includes modules for user shipments, online Stripe payment gateway integration, order tracking, orders, details, tracking, packages, customers, products, and more.

Hotel Management system:

I'm developing a hotel management system with an admin panel frontend and backend. It includes modules for hotel types, infrastructure, nutrition, service, transfer, customers, bookings, owners, and more. The frontend is built using Next.js with JavaScript, and the backend uses Node.js with Express.js. MongoDB is used for the database, and I've tested REST APIs using Postman.
